Consolidated income statement for the year ended 31 December 2025

USD thousands

	2025
Revenue	25,480
Cost of sales	(15,168)
Gross profit	**10,312**
Operating expenses	(5,557)
Operating profit	**4,755**
Share of profit of associates (equity method)	260
Dividend income from associates (eliminated)	-
Interest expense	(409)
Profit before tax	**4,605**
Income tax expense	(997)
Profit for the year	**3,609**
Attributable to owners of the parent	3,369
Attributable to non-controlling interests	240

Unrealised profit is eliminated in full against the seller (Sub One, 100% owned), so it has no NCI effect.

Share of profit of associates is after tax and after the impairment loss (see the Associates sheet). The group's share of unrealised profit on sales to associates is charged to cost of sales.

How each entity is treated under IFRS

Parent incorporated in the UAE; consolidated financial statements prepared under IFRS Accounting Standards

Entity	Relationship	Ownership	Standards	Method	How it is treated in this workbook
Parent Co. (UAE)	Parent and reporting entity, incorporated in the UAE		IFRS 10, IAS 1, IAS 21	Prepares the consolidated statements	The UAE requires companies to prepare their financial statements under IFRS, so the group reports under IFRS. Combined in full. Functional and presentation currency USD: most sales, pricing and financing are in USD (IAS 21.9), and the UAE dirham is pegged to it.
Subsidiary One (US)	Subsidiary: 100% of the voting rights gives control	100%	IFRS 10, IFRS 3	Full consolidation (acquisition method)	Combined line by line. The investment is eliminated against share capital and pre-acquisition reserves; any excess of cost is goodwill.
Subsidiary Two (Germany)	Subsidiary: 80% of the voting rights (a majority) gives control	80%	IFRS 10, IFRS 3, IAS 21	Full consolidation (acquisition method) with NCI	Translated from EUR to USD first. Combined line by line. The investment is eliminated against share capital and pre-acquisition reserves; any excess of cost is goodwill. Goodwill is held in EUR and retranslated at the closing rate. The other 20% is a non-controlling interest, shown in equity, with its share of profit and translation differences.
Subsidiary Three (UK)	Subsidiary: 70% held by Subsidiary One (US), so the parent controls it indirectly (sub-subsidiary)	70%	IFRS 10, IFRS 3, IAS 21	Full consolidation (acquisition method) with NCI	Translated from GBP to USD first. Combined line by line. The investment is eliminated against share capital and pre-acquisition reserves; any excess of cost is goodwill. Group effective interest is 70%; goodwill and NCI are measured on that interest. Goodwill is held in GBP and retranslated at the closing rate. The other 30% is a non-controlling interest, shown in equity, with its share of profit and translation differences.
Subsidiary Four (France)	Subsidiary: 75% held by Subsidiary Two (Germany), so the parent controls it indirectly (sub-subsidiary)	75%	IFRS 10, IFRS 3, IAS 21	Full consolidation (acquisition method) with NCI	Translated from EUR to USD first. Combined line by line. The investment is eliminated against share capital and pre-acquisition reserves; any excess of cost is goodwill. Group effective interest is 60%; goodwill and NCI are measured on that interest. The EUR holding company's investment is removed at the closing rate and its translation difference reversed. Goodwill is held in EUR and retranslated at the closing rate. The other 40% is a non-controlling interest, shown in equity, with its share of profit and translation differences.
Associate One (UAE)	Associate: 30% of the voting rights: presumed significant influence, not control	30%	IAS 28, IAS 21	Equity method	Not combined line by line. One line on the balance sheet (investment at cost plus share of post-acquisition profits, less dividends received) and one line in the income statement (share of profit). Goodwill stays inside the investment. Only the group's share of unrealised profit on trading with the associate is eliminated. Its results are translated from AED.
Associate Two (US)	Associate: 25% of the voting rights: presumed significant influence, not control	25%	IAS 28, IAS 36	Equity method	Not combined line by line. One line on the balance sheet (investment at cost plus share of post-acquisition profits, less dividends received) and one line in the income statement (share of profit). Goodwill stays inside the investment. Only the group's share of unrealised profit on trading with the associate is eliminated. The whole investment was tested for impairment under IAS 36 and written down.

Consolidation procedures and IFRS references

Step	IFRS reference	What the workbook does
1. Control (subsidiaries)	IFRS 10.6-7, B35	An investor controls an investee when it has power over it, is exposed to variable returns from it and can use its power to affect those returns. Subsidiaries One and Two are controlled directly through a majority of the voting rights, Subsidiary Three through Subsidiary One and Subsidiary Four through Subsidiary Two. Each is consolidated from the date control was obtained.
2. Significant influence (associates)	IAS 28.3, 28.5-6	Significant influence is the power to take part in financial and operating policy decisions without control. A holding of 20% or more of the voting power is presumed to give it, and board representation is typical evidence. Both associates are held at 25% to 30%.
3. Uniform policies and reporting date	IFRS 10.B87, B92-B93; IAS 28.33-36	All entities use the group's IFRS accounting policies and a 31 December year end, so no alignment adjustments are needed. Entities in countries that do not use IFRS locally (such as the US) report to the group on IFRS policies. A different year end would need adjusting for significant transactions and may differ by no more than three months.
4. Foreign currency translation	IAS 21.39-41, 21.44, 21.47; IAS 28.10	Subsidiary Two (EUR) is translated into USD: assets and liabilities at the closing rate, income and expenses at the average rate (an approximation of transaction-date rates) and share capital at the historical rate. The difference goes to the translation reserve in other comprehensive income, and the NCI's share is allocated to NCI. Subsidiary Three (GBP) is translated the same way, and its goodwill is treated as its own asset: held in GBP and retranslated at the closing rate, with the difference in the translation reserve. Associate One reports in AED, which is pegged to the USD, so no exchange difference arises; for a floating currency it would also go to the translation reserve.
5. Combine line by line (subsidiaries only)	IFRS 10.B86(a)	The assets, liabilities, income and expenses of the parent and its subsidiaries are added together in full, even where the group owns less than 100%.
6. Eliminate the investment; goodwill	IFRS 10.B86(b); IFRS 3.32; IAS 36.90	The parent's investment in each subsidiary is offset against its share of the subsidiary's equity at acquisition. Any excess is goodwill, which is not amortised but tested for impairment at least every year.
7. Non-controlling interests	IFRS 3.19; IFRS 10.22, B94	NCI is measured at its proportionate share of the subsidiary's identifiable net assets (the IFRS 3 choice made here, so no goodwill is attributed to NCI). It is shown in equity, separately from the parent's equity, and receives its share of profit and of translation differences.
8. Indirect holdings (sub-subsidiaries)	IFRS 10.B86, Appendix A; IFRS 3.19, 3.32	Control passes down the chain, so a subsidiary of a subsidiary is the parent's subsidiary and is consolidated in full. Goodwill and NCI use the group's effective interest: Subsidiary Three 100% x 70% = 70%, Subsidiary Four 80% x 75% = 60%. NCI in Subsidiary Four is 40%: the 25% direct minority plus the Subsidiary Two minority's 20% x 75% indirect share, less that minority's 20% share of Subsidiary Two's cost of investment.
9. Foreign holding company	IAS 21.39, 21.47; IFRS 10.B86(b)	Subsidiary Two holds Subsidiary Four in euros. Its investment is in its translated trial balance at the closing rate, so that amount is eliminated. Goodwill is measured with the cost at the historical rate, and the translation difference on the investment is reversed: the group's share from the translation reserve and the Subsidiary Two minority's share from NCI.
10. Intragroup transactions	IFRS 10.B86(c)	Intragroup balances, sales, purchases and unrealised profit in closing inventory are eliminated in full. The unrealised profit is charged to the selling entity; the seller is 100% owned, so NCI is not affected.
11. Equity method (associates)	IAS 28.10, 28.16	An associate is not combined line by line. The investment is recognised at cost and then increased or decreased by the group's share of the associate's profit or loss after acquisition. Dividends received reduce the carrying amount instead of being income, so the parent's dividend income is reversed.
12. Goodwill on associates	IAS 28.32, 28.42	The excess of cost over the group's share of the associate's net assets is included in the carrying amount of the investment. It is not shown separately, not amortised and not tested for impairment on its own.
13. Transactions with associates	IAS 28.28-29	Only the group's share of unrealised profit on sales between the group and an associate is eliminated. For a sale to the associate (downstream) it reduces the investment; for a purchase from the associate (upstream) it reduces group inventory. Balances with associates are not eliminated, because associates are outside the group.
14. Impairment of associates	IAS 28.40-43; IAS 36	After applying the equity method, the group checks for objective evidence of impairment. If there is, the whole carrying amount is tested as a single asset under IAS 36 and any loss reduces the investment. Associate Two carries an impairment loss.
15. Losses of associates	IAS 28.38-39	If the group's share of losses equals or exceeds its interest, it stops recognising further losses unless it has an obligation to fund them. Not triggered here.
16. Presentation	IAS 1.54(e), 1.82(c), 1.81B; IFRS 10.22	Investments in associates and the share of their profit are separate line items. Profit and equity are split between owners of the parent and NCI.
17. Disclosure	IFRS 12.21, B12-B14	Summarised financial information for each material associate and a reconciliation to its carrying amount (shown on the Associates sheet).
18. IFRS 18 (from 2027)	IFRS 18	IFRS 18 replaces IAS 1 for periods beginning on or after 1 January 2027. The share of profit of associates will then sit in the investing category, outside operating profit, as it already does in this income statement. These 2025 statements follow IAS 1.

Paragraph references are to the IFRS Accounting Standards as issued by the IASB.
